

your key to 360° logistics

Montegny Cargo is a fast growing logistics company specializing in the Ukrainian, Kazakhstan and Belarusian markets. Over a decade of success and operational experience guarantees our clients a fast and secure logistics supply chain from the EU which includes warehouse consolidation, handling, transport and customs clearance.

Entering new markets, especially in emerging economies, demands much more than traditional transportation and warehousing from freight forwarders or logistics providers.

We cooperate closely with a variety freight forwarders and expeditors as well as working on creating new structures for shipping – this allows us to keep our rates competitive and the quality of services high.
